

Empower AI elevates public sector teams with the power of artificial intelligence, to ensure America's missions are met.

We leverage deep technical expertise and decades of mission experience to give federal agency leaders the tools to elevate the potential of their workforce with a direct path for **meaningful transformation**.

Empower AI Platform[®]

We built the Empower AI Platform because every mission deserves the power of AI. The Empower Platform was designed for the unique challenges government has and the special ways that government works.

Empower AI LEADS

Empower AI Leads equips mission leaders to make better, faster decisions and achieve meaningful digital transformation. Empower AI Leads includes the methodology, governance, and visual displays to see the total impact of change.

Empower AI ADVISES

Empower AI Advises accelerates human decision-making with a side-by-side AI assistant to help make sense of the vast amounts of data available and streamlines the speed and accuracy of tasks so your team can make faster, more accurate decisions.

Empower AI WORKS

Empower AI Works helps teams shift focus to their most impactful work by automating complex human tasks with AI. Empower AI Works accurately and independently to automate tasks without the need for human intervention.

2x⁺

Return on Investment

90% savings

on staff time and resources

5x

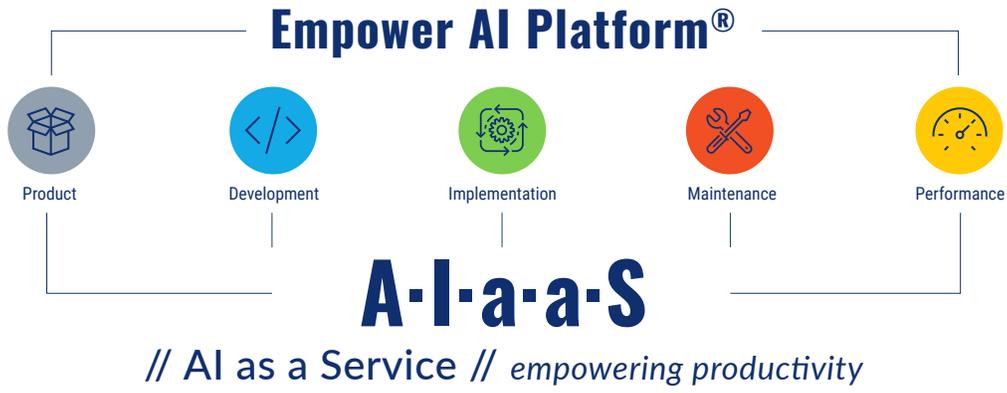

Faster than human work

98%

Productivity increase and improved security

92% of federal agency leaders believe AI is important to their mission outcomes, and yet the vast majority of AI transformations stall as pilots or fail altogether.

Empower AI's AI-as-a-Service model makes it easier for government to acquire, deploy, and adopt AI-enabled capabilities bundled in an all-inclusive package without the need to engage an army of vendors.

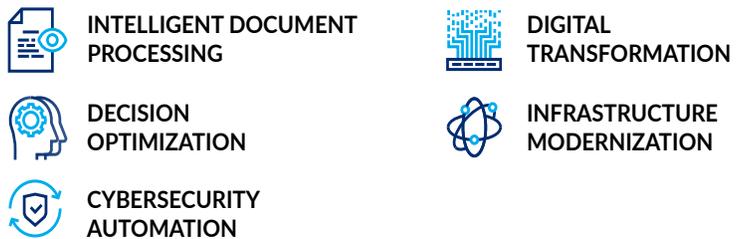

EMPOWER AI CUSTOMERS AND SOLUTIONS (Formerly NCI Information Systems)

For more than 30 years, Empower AI has been proud to serve a diverse set of federal customers with a wide range of AI-enabled technologies and other IT services.
