

Give your mission more capacity.

Your people know the mission. We give them more capacity to execute it, combining mission expertise, proven technology and governed AI inside the systems and workflows federal agencies depend on every day. Backed by KKR since 2022.

1989

delivering federal missions since

1,000+

people across the company

425+

cleared personnel

45

states and territories

CORE COMPETENCIES

AI and Data Services

Secure AI, automation and analytics that turn federal data into faster, more confident mission decisions.

Mission Support

Proven IT and engineering support that keeps defense and civilian missions operating securely and reliably.

Application Development

Custom, secure applications built and integrated to meet mission needs from day one.

Infrastructure Modernization

Modernizing and securing critical infrastructure to improve resilience, readiness and performance.

IT and Cloud Management

Agile IT and cloud services that reduce downtime, improve user experience and control costs.

Cybersecurity

Zero trust, mission-embedded cybersecurity protecting systems, data and operations end to end.

PAST PERFORMANCE

3 days

Catch network failures before users feel them.

Advance network-failure detection, at 90% accuracy

>30%

Turn ten million pages into actionable evidence.

Less document-review time

1 hr → 10 min

Turn an hour of waiting into ten minutes.

Bulk download, case processing

390

Keep authorization evidence ready, not rebuilt.

Security artifacts delivered on request

Let's start a conversation.
